

Amy Tang

Developer

hello@amytangcodes.com

SUMMARY

I am a Software Developer with a mix of experience working on web applications. I'm currently interested in roles with a focus on working with current Javascript frameworks as I do think my strongest skills are in UI development, but I also want to continue my experiences in backend development.

Get Guided, Toronto, ON — *Developer (Contract)*

April 2020 - June 2020

- Build login (Devise) and landing pages in Rails.

Skill Experience: Rails, HTML5, and CSS3

PathFactory, Toronto, ON — *Developer*

June 2018 - April 2020

- Lead a team in removing unused lifecycle methods to prepare for React 15 to 16 migration.
- Owned all front-end work for the new dynamic login feature that centralized PathFactory's customer's ability to log into their instance.
- Used Storybook to start building the company branding in collaboration with the design manager.
- Scalable and performant full-stack application development: Ruby/Rails, Elixir, ReactJS, HTML, CSS

Skill Experience: ReactJS, Rails, Elixir, MySQL, HTML5, CSS3, Git/ GitHub, Postman, JIRA

Info-Tech Research Group, Toronto, ON — *Front-End Developer*

December 2015 - June 2018

- Lead front-end developer for the McLean & Co site rebuild using HTML, CSS, and Rails.
- Redeveloped MyPolicies client dashboard.
- Part of a team overhauling the company's main site (www.infotech.com) involving web design upgrades, code cleanup, and organization, and site migrating from Bootstrap2 to Bootstrap3.
- Improved the development process of our customer-facing PDF web reports which were converted from HTML, CSS, and Javascript by building reusable templates thus eliminating the front-end backlog.
- Evangelized UI developer best practices such as pushing for more critical PR reviews and front-end code organization.
- Worked closely with the design and development teams locally and remotely.

Skill Experience: HTML5, CSS3/Sass, Bootstrap, JavaScript (jQuery, Handlebars and Highcharts), Git, Github, SourceTree, Terminal, JSON, ZSH, NPM, Ruby on Rails, Photoshop, JIRA
